Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 January 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: The preamble of the claim appears as a method claim, however there are no method steps. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11, 15-17, 19-21, 23-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Graham-Wood (US 3,304,675).

Graham-Wood disclose a building construction comprising a plurality of vertical members 11, a plurality of horizontal members 12 are secured to vertical members 11 by bolts 18 and forming typically rectangular configuration (fig. 2), vertical members 13 are channel-sectioned steel, girders 41, ground foundation 10 (see figs. 5-6).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3637

5. Claims 12-14, 18 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graham-Wood (US 3,304,675) in view of Ford (US 5,638,651). Graham-Wood disclose a building construction comprising a plurality of vertical members 11, a plurality of horizontal members 12 are secured to vertical members 11 by bolts 18 and forming typically rectangular configuration, vertical members 13 are channel-sectioned steel, girders 41 and a ground foundation 10.

Graham-Wood do not disclose expressly and specifically building members are made steel with exterior coating and rust-inhibitive material, members are joint by weld.

Ford teaches interlocking panel building system having steel channel 148 with galvanized coating. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to have Gram-Wood steel building members galvanized coating from Ford. The motivation for doing so would have been to provide structural building members free of rust thus preventing any fatigue failure.

With regard to claims 14, 18, and 22 Graham-Wood do not explicitly teach the building members are joint by weld, examiner considers this method of forming a device is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight. Furthermore, it has been held an obvious matter of design choice to have building structural members joint together by choice of fastening means (e.g. weld).

Art Unit: 3637

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. German Patent No. 2320917 and Sweden Patent No. 0663816 teach structural building members.
